Preschool Curriculum-Tools of the Mind

Tools of the Mind helps young children to develop the cognitive, social emotional, self regulatory and foundational academic skills they need to succeed in school and beyond.

Intentional make believe play is the heart of a Tools of a Mind Preschool classroom. Children also engage in activities to support the development of literacy, math, and science skills.

Learning takes place in large groups, small groups, and partnered activities. This builds social relationships and creates a positive classroom culture.
